COUNTRY ROADS BOARD.

EIGHTH ANNUAL REPORT.

Melbourne, 31st December, 1921.

The Honorable F. G. Clarke, M.L.C., Minister of Public Works, Melbourne.

SIR,

In conformity with the provisions of section 73 of the Country Roads Act No. 2635, we have the honour to submit to you the Eighth Annual Report of the proceedings of the Board, together with statement of accounts and balance-sheet as at 30th June, 1921.

The original provision of £2,000,000 for main road construction under Act No. 2635 became exhausted early in the period under review.

The second provision of £500,000 under Act No. 3057, however, became available, and was drawn upon to the extent of £177,245 1s. 11d., making a total expenditure at 30th June, 1921, of £2,177,245 1s. 11d.

As this latter provision of £500,000 was intended to last until 30th June, 1922, it was necessary to obtain a promise of additional funds to enable construction works to proceed uninterruptedly through the summer and autumn of that year, and also to enable surveys and plans, &c., to be prepared for the subsequent year's programme of works.

With this in view, Parliament authorized a further provision of £500,000 under Act No. 3137, thus making a total provision of £3,000,000 for the permanent improvement of main roads.

All the gazetted main roads in the State, of a total length of approximately 6,500 miles, have participated in this expenditure in some form or other, either in the construction of unmade sections or in the renewal of sections which through long years of neglect had become completely worn out, and in the erection of bridges of a permanent type.

MAINTENANCE OF MAIN ROADS.

Notwithstanding the assistance granted to Councils on the £ to £ basis under the principal Act, the frequency of public complaints, and the appeals and advice to municipal authorities to adopt more systematic methods of maintenance which have been rendered necessary by the increasing traffic of all kinds and the faster traffic of the self-propelled vehicle, the upkeep or maintenance of the principal arterial roads is far from satisfactory; in fact, the neglect in many instances is so studied and deliberate as to force the conclusion that it has become part of the general agitation for the State to undertake the whole responsibility of main road maintenance.

The Board, therefore, with a full knowledge of the position, and an appreciation of the seriousness of the effect of neglected maintenance having regard to the large capital expenditure involved in construction and the demands of the public under modern traffic conditions, has brought the matter, in the form of a special report, under the notice of the Government.

DEVELOPMENTAL ROADS.

The expenditure for the year on roads classed as developmental under Acts Nos. 2944 and 2985 amounted to £693,308 15s. 10d., or a total expenditure at 30th June, 1921, of £1,058,210 9s., the number of shires participating being 65.

While construction works have been proceeding vigorously in the 65 shires referred to, the inspection and selection of roads in the remaining shires eligible to participate is being continued.

When the Developmental Roads Act was passed by Parliament many of the shires were ineligible to participate in its benefits owing to the fact that their rating was under 1s. 6d. in the £1 on the net annual value. The benefits to be derived under this Act, however, by enabling them to have roads built in sparsely-populated districts and in soldier settlements, have induced many of them to raise their rates to the required minimum of 1s. 6d., with the result that very few shires are now ineligible on that account.

There are some shires, however, that are ineligible by reason of the fact that, although being rated at 1s. 6d. or over, it was found on inspection they had not, in the opinion of the Board, any roads of a developmental character as defined by section 3 of Act No. 2944. These shires, it should be explained, are in the older settled portions of the State where transport facilities, the development of the country, and rural production are far in advance of those districts which the Developmental Roads Act was mainly designed to serve.

Although inspections are being made as rapidly as time and circumstances will permit, certain other shires have not yet been visited by the Board for the selection of developmental roads, but they are situate in the northern and north-western wheat and grazing areas, where the road requirements are not so pressing as in the southern and mountainous portions of the State, or the northern irrigation areas and soldier settlements.

At the date of this Report, 517 roads have been selected, affecting 97 shires.

CLAIMS FOR COMPENSATION.

The necessity for compulsorily acquiring areas of land for the re-location of badly-located surveyed roads, and for eliminating dangerous curves, has been referred to in previous reports. That this branch of the business of road construction has attained considerable dimensions will be seen from the statement hereunder, which shows that in 1,306 instances land has had to be compulsorily acquired involving claims for compensation amounting to a total to date of £138,773 7s. 6d.

Of the 1,306 claims received, 998 have been settled at a cost of £47,274 16s. 3d., showing a saving of 56·4 per cent. on the total amount of claims finalized.

The procedure adopted by the Board for ascertaining the amount of compensation payable is that laid down in the Local Government and Land Compensation Acts :—

PRINCE'S HIGHWAY.

On the occasion of the visit of H.R.H. The Prince of Wales, in 1920, and at the instance of the National Roads Association, the main Gippsland road in this State from Melbourne easterly to the border of New South Wales was, with the consent of His Royal Highness, named the Prince's Highway.

During the year the name of the Prince's Highway has also been given to the Great Western route from Melbourne through Geelong, Warrnambool, and Portland, to the South Australian border, near Mount Gambier, the idea being to eventually connect all the capital cities of the Commonwealth by a great coastal route.

The length of the Highway in this State is 593 miles, and traverses its whole length from west to east, and the whole of it, with the exception of the short sections through the cities of Warrnambool, Geelong, and Melbourne and suburbs, has been gazetted under the Country Roads Acts.

Of the 593 miles in this State, fully 500 miles are in good order, and trafficable at all seasons. Of the balance, 30 miles in the eastern section are in the hands of Contractors, and in the extreme west, near Mount Gambier, an unmade section of twelve miles has been surveyed.

It is hoped that, within two years, the whole length of the Highway in this State, from the western to the eastern borders, will be fit for regular traffic.

MONTHLY REPORTS FROM SHIRE ENGINEERS.

Seven years ago all Councils were requested to cause their engineers to furnish them at each monthly meeting of the Council with a detailed report regarding the progress and condition of all works under their control that are being financed by the Board, and also to cause a copy of such report, after being dealt with by the Council, to be forwarded regularly to the Board after each Council meeting, the object being that both the Councils and the Board may be kept posted as to the state and progress of all works entered into with their sanction.

It is surprising how little this very reasonable request has been observed or complied with, and from some of the reports received it is very evident that certain of the Councils are very ill-informed as to the extent and progress of important works in their districts.

With a view, therefore, to having such reports made more informative, both for the Councils and the Board, it has been decided to adopt the form shown in Appendix J, which has been adopted and in use by the engineer of the newly-constituted Shire of Otway, Mr. R. R. B. Bennett.

The furnishing of this Report, both to Councils and the Board, at regular intervals of one month will be made obligatory on Councils under section 16 of the Country Roads Act and will be considered as part of the duties of officers for which payment of commission is authorized under section 17 of Act No. 2944.

DESTRUCTION OF TREES ON MAIN ROADS.

The authority granted to the Board under Act No. 2862 to control all timber growing on main roads has proved very beneficial in checking the destruction of native timber along the roadsides.

A special officer has been appointed to give effect to this provision whose duty is to patrol the main roads by motor vehicle and to institute proceedings in all cases of wilful destruction.

APPORTIONMENT OF COSTS.

The apportionment of the amount expended on Permanent Works and Maintenance on main roads during the financial year 1919-20 was made in accordance with the requirements of section 27 of the Country Roads Act, resulting in a debit to municipalities of £5,655 16s. 10d. on account of interest on Permanent Works expenditure, and of £94,371 4s. 5d. on account of expenditure in Maintenance, all of which amounts were duly received within the time specified.

A final payment of £20,000 was made to the Treasury on account of special loan of £80,000 granted under Act No. 2938 to temporarily supplement the Board's maintenance fund during the war period.

The complete liquidation of this loan a year sooner than was anticipated is gratifying, as the Fund, now relieved of the heavy annual payments to liquidate the loan, is required for maintenance purposes.

MOTOR CAR REGISTRATION.

The number of motor vehicles and motor cycles registered under the Motor Car Act during the year, including renewals, was 34,950, of which 22,667 were cars and 12,283 cycles, the net revenue received, including fines and licence fees, being £98,134 17s. 6d., an increase of £12,771 19s. 6d. over the previous year.

APPENDICES.

Particulars as to permanent works, both on main and developmental roads, and main roads maintained, and an account of all moneys received and expended during the year, as required by the Statutes, are shown in Appendices.

We have the honour to be,

Sir,

Your obedient servant,

W. CALDER, Chairman.

W. T. B. McCORMACK }
F. W. FRICKE } Members.

W. L. DALE, Secretary.
